THE FEMININE GUT · KITCHEN TOOLS

Prepare Your *Kitchen*

Simple tools for nourishment with less effort.

> Start with what you own. A useful kitchen supports the way you actually cook; you do not need every gadget or an expensive shopping list.

START HERE	WHAT IT HELPS YOU DO
01 Knife + cutting board	Prepare ingredients comfortably. Use a stable board and appropriate knife technique.
02 Saucepan + skillet	Cook proteins, vegetables, grains, and simple meals. Choose cookware that suits your needs and follow care instructions.
03 Sheet pan + oven dish	Roast or batch-cook suitable ingredients with minimal hands-on time.
04 Storage containers	Portion prepared food and keep your fridge or freezer organized. Use containers intended for their heating or freezing conditions.
05 Colander + measuring tools	Rinse produce, drain foods, and follow recipes when precision is helpful.

Organize for the next meal

Keep frequently used ingredients and tools easy to reach. Clear a preparation space, group storage lids with their containers, and check what needs using before you shop.

THE TEMPLE METHOD

Your first kitchen action

Choose one: organize a shelf, sharpen a suitable knife, prepare a container of vegetables, or make room in your freezer for a future meal.

Add Tools *With Purpose*

Choose upgrades that solve a real problem.

OPTIONAL TOOL	WHEN IT MAY HELP
01 Immersion blender	Blend soups and sauces. Follow heat limits and appliance instructions.
02 Countertop blender	Make smoothies, dressings, and suitable blended foods. Let hot liquids cool or use only equipment rated for hot blending.
03 Pressure cooker / multi-cooker	Batch-cook meals when you want less active cooking time. Follow pressure-release and food-safety instructions.
04 Food processor / chopper	Reduce repeated chopping or prepare sauces and dips.
05 Mandoline	Slice evenly when needed. Always use the hand guard or appropriate cut protection.
06 Freezer-safe containers	Store labeled portions for later meals. Leave space for expansion when appropriate.

Before you buy

- [ ] What task would this make easier?
- [ ] Will I use it often enough to justify the cost?
- [ ] Do I have space to store and clean it?
- [ ] Could a tool I already own do the same job?

Keep preparation realistic

Choose two or three meal components to prepare, rather than filling every available hour with cooking. Frozen produce and other suitable convenience foods can help you keep the routine manageable.
